

EL PASO ENERGY SERVICE COMPANY
Strategy & Market Analysis
01/01/2010

Manager, Market & Project Analysis

Responsible for analysis of market and competitor analysis, short and long-term revenue forecasting and capacity evaluation for the Western Pipelines.

Consultant, Strategy & Business Development

Develops all economic analysis for capital projects and or transportation contracts. Analyzes the macro and micro market activities for the strategic plan throughput forecast. Continually monitors the market to provide strategic insight to EPNG and Mojave Pipeline Company management, mainline transportation and operations. Responsible for valuing long term available capacity on the system.

Strategist, Principal

Coordinates and leads team efforts related to all aspects of planning and rates for the Western Pipelines. Provides advanced analytical support to the market and project analysis processes.

Analyst, Project-Senior

Responsible for developing advanced core algorithms and performing real-time analysis supporting marketing and asset optimization decisions. Provides support in key areas by: writing algorithms to project prices for various natural gas pricing points; developing advanced models, spreadsheet algorithms, and optimization tools; and designing, developing and implementing software-based tools to price and value natural gas transportation products across the El Paso Western Pipeline system.
